JavaScript

HTML/CSS

Bootstrap

Node JS

Express JS

MongoDB

Postgresql

- Mongoose
- Sequelize
- JWT
- OAuth
- Web-sockets
- Docker
- AWS, Heroku
- Postman, VS Code

## PROJECTS

### SHARING BENEFITS (CAPSTONE PROJECT)

Node.JS, Express.JS, Express-Handlebars, OAuth, MongoDB

This app allows users to share ongoing shopping offers. Users can create posts with offer details and find another user who is interested in the offer. Both users can shop for the min threshold bill value to avail the offer and share benefits. This App also displays the current offers running in the market, which users can use to create posts.

### IMDB CLONE

Node.JS, Express.JS, Express-Handlebars, JWT, Postgresql

Developed a clone of the popular movie database with an option for users to browse popular movie info, ratings & cast details. Users can also add movie details

### HACKER NEWS CLONE

Node.JS, Express.JS, EJS, Passport-local, MongoDB

Simulated a clone of the Hacker News website where users can Login/Register, Submit a post & View Tech related posts. Also enabled Edit and Delete options for previously uploaded posts.

### E-COMMERCE APPLICATION

Node.JS, Express.JS, EJS, JWT, Bootstrap, Postgresql

Built an E-commerce application where users can purchase products. Incorporated user Authentication, Products by Category, Add to Cart and Place Order options.

### CHAT APPLICATION

Node.JS, Express.JS, Socket.io, JWT, Postgresql

Created a Chat Application which allows users to Login or Register and Chat with other Users. Enabled Get and Post requests for sending and receiving messages without refreshing the route utilizing Socket.io
